

# UN BEAR ABLE

A close-up, high-contrast, textured portrait of a woman with her hand to her face, set against a green background. The image has a grainy, almost woodcut-like quality. The woman's eyes are closed, and her hand is positioned near her mouth and nose, suggesting a gesture of distress or contemplation. The background is a solid, vibrant green.

Against the  
privatisation  
of suffering

medico international

PSYCHOSOCIAL WORK in a disturbed world means that individual suffering needs to be made perceptible as a shared social experience. To counter the privatisation of suffering, medico encourages **EMANCIPATORY CARE RELATIONSHIPS** which connect people in **EMPATHY** and **SOLIDARITY** across all borders and boundaries.

As a **CRITICAL AID AND HUMAN RIGHTS ORGANISATION**, medico international joins forces with activists and human rights organisations in Asia, Africa, Latin America and Europe. We fight for a fairer world **ON THE SIDE OF THOSE EXCLUDED** from globalised capitalism and those affected by oppression and war.
